Relevant Coursework

- Data Structures and Algorithms
- Object-Oriented Programming
- Operating Systems
- Introduction to Artificial Intelligence & Machine Learning
- Database Management Systems
- Web Technologies

Projects

Student Result Management System | Java, OOP, MySql

- Designed and developed a GUI-based result management system with secure login and role-based access for Admin and Students. Integrated MySQL for persistent storage of student records and implemented operations such as add, update, delete, and search. Generated result reports and performance summaries with visualization, while ensuring modularity and scalability through Object-Oriented principles.

Portfolio Website | HTML, CSS, JavaScript

- Developed a responsive portfolio showcasing skills and projects using a clean HTML/CSS/Bootstrap template.
- Launched via GitHub Pages for easy access and visibility.

Performance Analysis and Prediction | Python, Machine Learning

- Built a KNN-based model to analyze and predict performance from dataset.
- Performed preprocessing, visualization, and evaluation with accuracy/F1-score.
