Khush Sonani

KhushSonani

Summary

Computer Science undergraduate at Nirma University (CGPA 8.52/10) with a strong record in competitive programming — **LeetCode Knight, top 1.67% globally** (rating 2082, 1000+ problems solved) and Codeforces Specialist (rating 1454). Builds full-stack systems using the MERN stack, including a real-time ride-hailing platform with WebSocket-driven architecture. Combines deep algorithmic foundations with hands-on engineering experience across backend APIs, real-time systems, and responsive frontends.

Experience

Full Stack Developer Intern — Empiric Infotech LLP, Surat

May 2026 – June 2026

- Built **Nexus**, an internal client engagement portal to manage dedicated developer assignments, project milestones, and monthly hour tracking across 10+ simultaneous client accounts.
- Implemented **three-tier role-based access control** (Admin, Client, Developer) using JWT authentication and protected REST APIs in Node.js and Express.js, with structured MongoDB schemas.
- Developed dynamic, role-specific dashboards in **React** with real-time hour utilisation tracking (160–172 hr/month model), milestone progress, and engagement status across all clients.

Technical Skills

Languages: C++, Java, Python, C, JavaScript, HTML5, CSS3

Technology/Framework: React.js, React Native, Node.js, Express.js, WebSockets / Socket.IO, Tailwind CSS

Databases: MongoDB, RDB - SQL

Tools: Git, GitHub, Vercel, Postman, Nodemailer

Projects

RideSync – Real-Time Ride-Hailing Platform | *MongoDB, Node.js, Express.js, React Native, Socket.IO*

- Architected a full-stack ride-hailing platform covering the complete request lifecycle – from ride booking and driver matching to trip completion – using a decoupled service design.
- Built **event-driven, bidirectional communication** via Socket.IO, enabling real-time ride status updates and driver–rider messaging with sub-second latency.
- Developed a **RESTful API layer** using Node.js and Express.js with JWT-based authentication, stateless session handling, and structured MongoDB schemas for users, drivers, and trips.
- Designed a cross-platform mobile frontend in **React Native**, delivering a responsive and intuitive ride-booking experience on both iOS and Android.

Student Result Management System | *Java, File I/O*

- Developed a console application for academic record management with full CRUD operations — add, update, search, and display — backed by persistent file-based storage.
- Applied OOP principles including encapsulation, abstraction, and modularity to cleanly separate business logic from data persistence, ensuring reliability and maintainability.

Achievements

- Global Rank 668** — LeetCode Weekly Contest 462, competing among 15,000+ participants worldwide
- Global Rank 806** — LeetCode Weekly Contest 474 — **Global Rank 820** — Weekly Contest 455
- Global Rank 148** — CodeChef Beginner Contest — **Global Rank 828** — Codeforces Round 1050
- Solved **2600+ problems** across LeetCode, Codeforces, CodeChef, CodeStudio, and GeeksforGeeks
- LeetCode **Knight** (Rating: 2082, Top 1.67%) — Codeforces **Specialist** (Rating: 1454, Top 17.61%) — CodeChef **3-Star** (Rating: 1708)

Education

B.Tech in Computer Science and Engineering — Nirma University, Ahmedabad

2023 – 2027

CGPA: 8.52 / 10.0

Relevant Coursework

- Core:** Data Structures & Algorithms, Graph Theory, Object-Oriented Programming, Operating Systems, Computer Networks
- Systems & Data:** Database Management Systems, Web Technologies
- AI & Analytics:** Basics of Artificial Intelligence & Machine Learning, Probability & Statistics
